

Art. 163656

Product features

- Built-in non isolated adjustable power LED driver
- Supports 0...10V / PWM dimming
- Color temperature adjustable
- DIP control adjusts the current
- 12 V 0.1 A Auxiliary source
- Flicker free LED driver
- Output current 50...400 mA by DIP switch adjust
- Max. output power 42 W
- For luminaires with protection class I
- 5 years warranty

Supplementary instructions

- It is recommended that customers install under voltage protection and surge protection devices in the power supply circuit of lamps to ensure the safety of electricity consumption.
- The power supply is used in combination with the terminal equipment as a part of the whole lamp. Because the EMC
 performance is affected by LED lamps and wiring, the terminal is set in case the manufacturer needs to reconfirm the
 EMC of the whole device.
- The outputs of drivers cannot be in paralleled.
- Short circuit protection: Hiccup mode protection device will trigger when short circuit and will auto recover after the fault mode is removed.

Weight	7.5 kg

Wiring diagram

- All connections must be as short as possible to ensure good EMI performance.
- The luminaire wire should keep a certain distance from the LED power supply and other wires (5 10 cm is preferred).
- Incorrect wiring can damage the LED.
- The wire must be well protected against short circuit.
