Art. 160990

The luminaire manufacturer is responsible for measuring and verifying the EMI compliance of the complete luminaire, as the level of radio interference will vary depending on the luminaire construction. Especially primary and secondary cable lengths and their routing may have a significant effect on radio interference.

Installation instruction

- Install the LED driver in the direct neighborhood of other cupower products.
- The LED driver contains an antenna for wireless communication with other cupower products. Operation of the antenna should not be disrupted.
- Do not mount the LED driver inside a metal housing or directly next to a large metal object.
- Some glass and plastic materials influence the operation of an antenna.
- Contact cupower in case of doubt via: https://www.cupower.com/.

Cupower configuration

- Cupower is a unique, fully wireless control system. For more information about cupower: https://www.cupower.com/.
- The LED driver is cupower Smart Ready.
- When the LED driver is powered, the connected lamp goes on.
- The cupower software licence is delivered separately to the client and activated during commissioning of the cupower solution.
- The LED driver is compatible to work with cupower enabled equipment.
- The LED driver is configurable via the cupower app and management system.
