## **Supplementary instructions**

- Meet FCC requirements, The power supply is used in combination with the terminal equipment as a part of the whole lamp.
  Because the EMC performance is affected by LED lamps and wiring, the terminal is set In case the manufacturer needs to reconfirm the EMC of the whole device.
- The outputs of drivers cannot be in paralleled.

### **Protection**

- Over voltage protection: Hiccup mode. protection device will trigger when load voltage exceeds specified output voltage and will auto recover after the fault mode is removed.
- Short circuit protection: Hiccup mode. protection device will trigger when short circuit and will auto recover after the fault mode is removed.
