#### Supplementary instructions

- The luminaire manufacturer is responsible for measuring and verifying the EMI compliance of the complete luminaire, as the level of radio interference will vary depending on the luminaire construction. Especially primary and secondary cable lengths and their routing may have a significant effect on radio interference.
- Short circuit protection: Hiccup mode. Protection device will trigger when short circuit and will auto recover after the fault mode is removed.

#### Wiring diagram

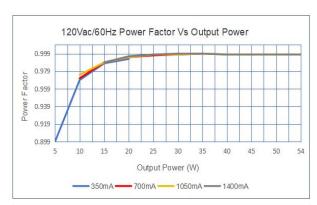

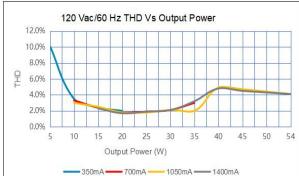

- All connections must be as short as possible to ensure good EMI performance. ٠
- The luminaire wire should keep a certain distance from the LED power supply and other wires (5...10 cm is preferred). ٠
- No secondary switches are allowed. ٠
- Incorrect wiring can damage the LED. •
- The wire must be well protected against short circuit. •
